THE PATH: BEYOND THE PHYSICAL

The Path: Beyond the Physical focuses on ways in which humans can change their perception in order to experience the non-physical aspects of our existence while living in the physical body.

The Path: Beyond the Physical investigates topics about life after death, out-of-body experiences, multiple-dimensions, remote viewing, consciousness and all the realms that fall beyond outside of our physical bodies. BTP focuses on ways in which humans can shift their consciousness in order to experience the non-physical aspects of our existence while living in the physical body. The film will take the audience through a 93 minute journey of some of the first explorers of out-of-body experiences like Robert Monroe, to the once classified military mission of remote viewing, while the experts in the film educate the audience about tools like hemi-sync music that can enhance the out-of-body experience. All of the Path Documentary DVD Series will be showcasing the knowledge and opinions of many experts like the former President and Executive Director of the Monroe Institute in Faber, VA, a nonprofit 501(c)(3) educational and research organization dedicated to the exploration of human consciousness, which is internationally known for its work with audio sound patterns that can have dramatic effects on states of consciousness, along with leading out-of-body expert William Buhlman and a NASA nuclear physicist, noted lecturer and explorer of consciousness Thomas Campbell, from Huntsville, Alabama.

Directed by Michael Habernig
